Benny Feigin

Benny's Requirement and stories

Requirement Number	Requirement Name	STORY Number	STORY Name
4.3	Registration screen	4.3.37	As an unregistered user, I want to register after filling all the fields with correct values, except for the second address line
		4.3.38	As a non-registered user, I would like to receive an error message on each field that I filled in incorrectly with details of the correct way in which the field should be filled in so that I can correct the input
		4.3.39	As the site administrator, I want to check that a user with the same username has not registered before to avoid identification errors
		4.3.40	+-)(:As the site administrator, I want the phone field to contain only digits and the following signs
		4.3.41	As the site administrator, I want the email field to contain the @ character when preceded by at least one letter and followed by the server (address (at least letter.letter
		4.3.42	As the site administrator, I want the zip code field to contain only digits, and be only 5-7 characters long
		4.3.43	As the site administrator, I want the default value for the country to be USA
		4.3.44	As the site administrator, I would like the option not to fill in the State field if a country other than the USA is listed in the country field
		4.3.45	As the site administrator, I want the correct value of the fields: username, password, first name, password, address 1, address 2, city and country. will contain only the following characters: English uppercase and lowercase letters, spaces, hyphens, digits, underscores, slashes
		4.3.46	As the site administrator, I want the username field to not start or end with a space
		4.3.47	As the site administrator, I would like to be able to open an alphabetical list of countries
		4.3.48	As an unregistered user, I would like to receive a notification that the registration was successful after registration
		4.3.49	As an unregistered user, I want to automatically log into the site upon successful registration
		4.3.50	As the site administrator, I want if the password field does not match the rewritten password, the registration will fail
		4.3.51	As the site administrator, I want the cursor to return to the first field that was filled in improperly after the error message
		4.3.52	As the site administrator, I want every time I enter the registration screen - all the fields will be empty, except for the fields whose defaults are set
		4.3.53	As the site administrator, I want every time I enter the registration screen, the fields that have a default set to show default
		4.3.54	As the site administrator, I want the default language to be English
		4.3.55	As the site administrator I want the default favorite category to be birds
		4.3.56	As the site administrator I want the default MyList and myBanner fields to be checked
		4.3.57	As a registered user, I want to see the details with which I registered when entering the registration screen
		4.3.58	As a registered user, I want the option to update my registration information

Benny Feigin Test Cases

The following test cases will be presented in the following slides:

- Test 4.3.41.2 - Typing an invalid email format
- Test 4.3.59.1 Verifying that the text in the password field appears in the form of asterisks on the Registration page
- Test 4.3.45.8 Typing Hebrew letters in the username field

Benny Feigin

Requirement 4.3.41

As the site administrator, I want the email field to contain the @ character when preceded by at least one letter and followed by the server address (at least letter. Letter)
